Carlson biological psychology pdf windows 7 download

Savvas Learning Company is a trademark of Savvas Learning Company LLC. K12 Educators: Contact your Savvas Learning Company Account General Manager for purchase options. APS Reader, Current Directions in Biopsychology included in MyPsychLab SUPPORT INSTRUCTORS Instructor's Manual (ISBN 020523951X) Each chapter includes an Integrated Teaching Outline with teaching objectives, lecture material, demonstrations and activities, videos, suggested readings, web resources, and information about other supplements. Overview of Changes 2. Full Table of Contents 1. Class Prep, within MyPsychLab, collects the very best class presentation resources in one convenient online destination, so instructors can keep students engaged throughout every class. The Pearson eText allows students to access their textbook anytime, anywhere, and any way they want—including listening online or downloading to their iPad. A 3D Virtual Brain enables students to better visualize the workings of the brain. Class Prep collects the very best class presentation resources in one convenient online destination, so instructors can keep students engaged throughout every class. An appendix contains a set of student handouts. Brief Table of Contents 2. Both the Test Bank and MyTest are available online at www.pearsonhighered.com/irc, and within the instructor account in MyPsychLab. 81)A 3D Virtual Brain in MyPsychLab enables students to better visualize the workings of the brain. With results feeding into a powerful gradebook, the assessment program helps instructors identify student challenges early—and find the best resources with which to help students. FULL TABLE OF CONTENTS Chapter 1 Introduction Understanding Human Consciousness: A Physiological Approach The Nature of Physiological Psychology Natural Selection and Evolution Ethical Issues In Research With Animals Careers in Neuroscience Strategies for Learning Chapter 2 Structure and Functions of Cells of The Nervous System Cells of the Nervous System Communication within a Neuron Communication between Neurons Chapter 3 Structure of the Nervous System Basic Features of the Nervous System The Central Nervous System The Peripheral Nervous System Chapter 4 Psychopharmacology Principles Of Psychopharmacology Sites Of Drug Action Neurotransmitters and Neuromodulators Chapter 5 Methods and Strategies of Research Experimental Ablation Recording And Stimulating Neural Activity Neurochemical Methods Genetic Methods Chapter 6 Vision The Stimulus Anatomy of the Visual System Coding Of Visual Information in the Retina Analysis of Visual Information: Role of The Striate Cortex Analysis of Visual Information: Role of The Visual Association Cortex Chapter 7 Audition, the Body Senses, and the Chemical Sense Audition Vestibular System Somatosenses Gustation Olfaction Chapter 8 Control of Movement Muscles Reflexive Control of Movement Control of Movement by the Brain Chapter 9 Sleep and Biological Rhythms A Physiological and Behavioral Description Of Sleep Disorders of Sleep Why Do We Sleep? Physiological Mechanisms of Sleep And Waking Biological Clocks Chapter 10 Reproductive Behavior Sexual Development Hormonal Control of Sexual Behavior Neural Control of Sexual Behavior Parental Behavior Chapter 11 Emotion Emotions as Response Patterns Communication of Emotions Feelings of Emotions Chapter 12 Ingestive Behavior Physiological Regulatory Mechanisms Drinking Eating: Some Facts about Metabolism What Starts A Meal? What Stops A Meal? Brain Mechanisms Obesity Anorexia Nervosa/Bulimia Nervosa Chapter 13 Learning and Memory The Nature of Learning Synaptic Plasticity: Long-Term Potentiation and Long-Term Depression Perceptual Learning Classical Conditioning Instrumental Conditioning Relational Learning Chapter 14 Human Communication Speech Production and Comprehension: Brain Mechanisms Disorders of Reading and Writing Chapter 15 Neurological Disorders Tumors Seizure Disorders Cerebrovascular Accidents Disorders of Development Degenerative Disorders Disorders Caused By Infectious Diseases Chapter 16 Schizophrenia and The Affective Disorders Schizophrenia Major Affective Disorders Chapter 17 Anxiety Disorders, Autistic Disorder, Attention-Deficit/Hyperactivity Disorder, and Stress Disorders Anxiety Disorders Autistic Disorder Attention-Deficit/Hyperactivity Disorder Stress Disorders Chapter 18 Drug Abuse Common Features of Addiction Commonly Abused Drugs Heredity and Drug Abuse Therapy for Drug Abuse Pearson offers affordable and accessible purchase options to meet the needs of your students. 227) Review Questions are included at the end of each chapter so the students can check their understanding of the chapter's content. Available online at www.pearsonhighered.com/irc and within the instructor account in MyPsychLab. Class Prep collects the very best class presentation resources in one convenient online destination, so instructors can keep students engaged throughout every class. Flashcards allow students to quiz themselves on key terms in each chapter Class Prep collects the very best class presentation resources in one convenient online destination, so instructors can keep students engaged throughout every class. For this edition, the slides have been enhanced with even more visual appeal to engage students. A personalized study plan for each student, based on Bloom's Taxonomy, arranges content from less complex thinking—like remembering and understanding—to more complex critical thinking—like applying and analyzing. IMPROVE CRITICAL THINKING Section Summaries with Thought Questions appear at the end of each major section, so the students have the chance to stop and review several times in each chapter. The new MyPsychLab delivers proven results in helping students succeed, provides engaging experiences that personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. This learning application has assessments tied to it in order to make parts of it assignable to students. The Pearson eText allows students to access their textbook anytime, anywhere, and any way they want—including listening online or downloading to their iPad. Overview of Changes THE MOST CURRENT, COMPREHENSIVE, AND TEACHABLE TEXT FOR PHYSIOLOGICAL PSYCHOLOGY Over 400 New References reflect the rapid evolution of biopsychology as a field. Here's how: Personalize Learning - The new MyPsychLab delivers proven results in helping students succeed, provides engaging experiences that personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. (ex. Highly visual PowerPoint Slides (ISBN 0205239498) provide a framework for lecture outlines with images from the text. With results feeding into a powerful gradebook, the assessment program helps instructors identify student challenges early-and find the best resources with which to help students. No other author compares to Carlson when it comes to thoroughly updating research. APS Reader, Current Directions in Biopsychology Assessment tied to every video, application, and chapter enables both instructors and students to track progress and get immediate feedback. Every chapter begins with a Total Assessment Guide explaining the category of each question. The new research reported in this edition reflects the enormous advances made in research methods. 98) ENGAGE STUDENTS Each chapter begins with a Case History, which describes an episode involving a neurological disorder or an issue in neuroscience. 98) SUPPORT INSTRUCTORS Expanded Test Bank (ISBN 0205239501): Includes a minimum of 100 multiple choice questions, 20 fill-in-the-blanks, and 10 essays. 2. Support Instructors - With resources such as Instructor's Manual, Test Bank, highly visual PowerPoint Slides, and for the first time ever, the new MyPsychLab with ClassPrep, instructors have everything they need to teach behavioral neuroscience. BRIEF TABLE OF CONTENTS Chapter 1 Introduction Chapter 2 Structure and Functions of Cells of the Nervous System Chapter 3 Structure of the Nervous System Chapter 4 Psychopharmacology Chapter 5 Methods and Strategies of Research Chapter 6 Vision Chapter 7 Audition, the Body Senses, and the Chemical Sense Chapter 8 Control of Movement Chapter 9 Sleep and Biological Rhythms Chapter 10 Reproductive Behavior Chapter 11 Emotion Chapter 12 Ingestive Behavior Chapter 13 Learning and Memory Chapter 14 Human Communication Chapter 15 Neurological Disorders Chapter 16 Schizophrenia and the Affective Disorders Chapter 17 Anxiety Disorders, Autistic Disorder, Attention-Deficit/Hyperactivity Disorder, and Stress Disorders Chapter 18 Drug Abuse 2. 78) MyPsychLab! For the first time, MyPsychLab is available with Carlson's Physiology of Behavior. Chapter-by-Chapter Changes 1. The Test Bank is also available in Pearson MyTest (ISBN 0205239498), a flexible online test-generating software allowing instructors to quickly and easily create customize tests with MyTest. Assessment tied to every video, application, and chapter enables both instructors and students to track progress and get immediate feedback. Improve Critical Thinking - Section Summaries with Thought Questions help students test their understanding of the materials. See below for a more detailed description. This hands-on experience engages students and helps make course content and terminology relevant. Explore Research - In light of the rapidly evolving field of behavioral neuroscience, over 400 new references are included in this edition. 71)A 3D Virtual Brain enables students to better visualize the workings of the brain. Section Summaries now include Thought Questions so students can test their understanding of the material. 78)Accurate, visually-stunning art results in clearer, more consistent and more student-friendly illustrations than any other biological psychology textbook. 227)New Review Questions are included at the end of each chapter so the students can check their understanding of the chapter's content. Available online at www.pearsonhighered.com/irc and within the instructor account in MyPsychLab. IMPROVE CRITICAL THINKING Strong pedagogy supports students by identifying the main ideas and applying concepts in each chapter. Expanded Test Bank (ISBN 0205239501): Includes a minimum of 100 multiple choice questions, 20 fill-in-the-blanks, and 10 essays. 78)Chapter 5 provides students with a thorough introduction to research methods, complete with coverage of the new tools and strategies researchers employ in their study of brain and behavior. The most current, comprehensive, and teachable text for behavioral neuroscience Thoughtfully organized, Physiology of Behavior provides a scholarly yet accessible portrait of the dynamic interaction between biology and behavior. Other case histories are included in the text of the chapters. Selected Chapter-by-Chapter Changes Include: Chapter 6 Animal research on gene therapy for color blindness Williams syndrome and the fusiform face area Enhanced connections between auditory cortex and visual cortex in blind people Chapter 7 Reaction to dissonance in newborns Kinesthesia from skin receptors Kinesthesia from skin receptors New research on placebo analgesia New research on fat taste New research on olfactory coding in the cortex Chapter 8 Interhemispheric transfer of motor learning Role of frontopolar cortex in decisions to move The hyperdirect pathway of the cortico-basal ganglia circuitry Chapter 9 Health effects of chronic sleep deprivation Role of variants in the gene for adenosine deaminase in sleep need New optogenetic studies on role of noradrenergic and orexigenic neurons in sleep and waking Chapter 10 Role of kisspeptin in stimulation of puberty and control of secretion of sex hormones Stimulation of neurogenesis by odor of potential sex partners New research on congenital adrenal hypertrophy Research on the role of the uncinate nucleus on gender identity Role of prolactin in parental behavior by human fathers Chapter 11 New research on the role of the prefrontal cortex on courage "Emotional contagion" in people with blindsight The simulationist hypothesis of recognition of emotional expressions Effects of Botox treatment of facial muscles on mood Chapter 12 Role of the FTO gene in obesity Chapter 13 Discovery of the role of PKM-zeta in longlasting long-term potentiation Role of the basal ganglia in filtering irrelevant information out of short-term memory New research on place cells, grid cells, head direction cells, and border cells Role of sharp-wave-ripple complexes during slow-wave sleep in memory consolidation New research on reconsolidation of memories Chapter 14 Role of sensorimotor function and mirror-neuron circuits in speech perception Role of subvocal articulation in word recognition in deaf people New section on recognition of people's voices Research on the relation between object recognition and reading Chapter 15 Role of tumor initiating cells in malignant gliomas New research on treatment for cerebral blood clots New section on traumatic brain injury Prion-like behavior of misfolded a-synuclein and Ab proteins Optogenetic methods in research on Parkinson's disease Chapter 16 Research on the role of DISC1 in schizophrenia and other mental disorders Role of maternal substance abuse in development of schizophrenia in offspring Season of birth in development of depressive disorder Deep brain stimulation as treatment for depression New section on role of the frontal cortex in development of depression Increased apoptosis and depressive behavior after prolonged exposure to darkness Chapter 17 Role of variations in the gene for BDNF in anxiety disorders Research on efficacy of a neurosteroid enhancer in treatment of anxiety disorders Research on oxytocin treatment to improve social interactions in autism spectrum disorders Role of prenatal androgens in development of autism spectrum disorders Role of variations in the gene for COMT in development of PTSD Transcranial magnetic stimulation of the dorsolateral PFC for treatment of PTSD Chapter 18 Discovery of the role of orexin and MCH in addiction Role of the medial habenula and the interpeduncular nucleus in nicotine addiction Role of variations in the gene for a5 ACh receptors in nicotine addiction Inhibitory role of cannabidiol on addictive potential of marijuana Role of sirtuins in the addictive potential of cocaine Deep brain stimulation and TMS as a treatment for drug addiction In This Section: 1. Engage Students - A close collaboration between the author and a talented artist has resulted in beautiful, accurate, and pedagogically effective illustrations in every chapter. A personalized study plan for each student, based on Bloom's Taxonomy, arranges content from less complex thinking—like remembering and understanding—to more complex critical thinking—like applying and analyzing. See any of the following pages for a complete listing of packages available: p. A 3D Virtual Brain in MyPsychLab enables students to better visualize the workings of the brain. Connect with us to learn more. THE MOST CURRENT, COMPREHENSIVE, AND TEACHABLE TEXT FOR PHYSIOLOGICAL PSYCHOLOGY Over 400 New References reflect the rapid evolution of biopsychology as a field. Updated Section Summaries with Thought Questions appear at the end of each major section, so the students have the chance to stop and review several times in each chapter. In This Section: 1. Close collaboration between the author and a talented artist has resulted in beautiful, accurate, and pedagogically effective illustrations in every chapter. (ex. Instant Access ISBNs are for individuals purchasing with credit cards or PayPal. Integrated for the first time with MyPsychLab, featuring an interactive Virtual Brain, chapter study plans, flashcards, and other resources, Carlson's 11th edition offers students an immersive and engaging experience. A better teaching and learning experience This program will provide a better teaching and learning experience- for you and your students. Every multiple choice question has rationales to further explain the answer. An assignment calendar allows instructors to assign graded activities, with specific deadlines, and measure student progress. The new research reported in this edition reflect the enormous advances made in research methods (ex. This revision incorporates the latest discoveries in behavioral neuroscience, and includes over 400 new references. 98) EXPLORE RESEARCH Over 400 New References reflect the rapid evolution of Biopsychology as a field.
